THE PUBLIC DEBT STATEMENT.

The suggestive points of the speculation on the street to-day were, first, the announcement of the tended sale of gold during the present month by cretary Richardson to the extent of \$3,000,000, secondly, the intelligence that a further called legal, ader reserve sufficient to make the total outstanding greenback circulation \$382,000,000. The first mentioned circumstance

those not posted, coming, as it did, in the face of a denial made to a HERALD correspondent on Thurs-day last by the Secretary upon inquiry as to the truth of rumors then prevailing on the street. The PRIDAY MORNING CONTAINED THE FOLLOWING in its Washington column, the same being an answer, as before stated, to an inquiry made:-

swer, as before stated, to an inquiry made:—
Secretary Richardson authorizes the statement
that a resumption of sales of gold has neither been
considered nor determined upon. The gold receipts continue small, all reports to the contrary
notwithstanding, and until there is a revival of the
import trade it is hardly probable that the present
policy will be changed. He also says that whenever the sale of gold is to be renewed the programme will be almounced as formerly, and will
not be intimated in any other manner.

This, it may be urged on the part of the Secretary contains no specific denial of the popular

tary, contains no specific denial of the popular ramor that sales of gold were intended in March; but surely it cannot be that the interests of this country require such gauzy parrying with the truth, as such a deience supposes. Besides, how explain the fact of the announced sales following closely upon a rumor of such an intention on the part of mitted for six months, and earned, as a policy of Treasury management, the opposition of most of the intelligent financial minds of the country? There is certainly little to be hoped for from a Sec-retary capable of such filmsy expedients to dis-guise his weakness as the chief fiscal officer of the United States. And here comes

THE EXPLANATION OF THIS REVIVED GOLD SELLING EXPERIMENT.

The Secretary has to meet this month a demand upon him on account of pensions to the extent of \$8,000,000 accrued indebtedness. Of course it may not be called for all at once, but it has to be provided for. To do this he-on Saturday, at the se of business, so that it only reached here Saturday evening after everybody had gone home, ment of that amous tucus a non tucendo pattern now so much in vogue and which so few read added something like \$700,000 to the outstanding legal tenders from the now famous "reserve." making to total present issue an even \$382,000,000. It is to be presumed he at the same time decided upon his gold sales. This, he claims, will enable im to meet all demands on the Treasury without calling further upon the reserve. The country would take comfort even out of this

IF MB. RICHARDSON'S ASSURANCE COULD BEARBLIED UPON that he would fix \$382,000,000 as the maximum legal tender issue. But if there was nothing in his previous course to render such an expectation iiory, vague and unsatisfactory, his conduct in this very matter of resuming the gold sales would furnish grave cause of uneasiness. Besides his own utterances on the subject, it is further stated, speaking of the legal tenders, "there is reason to believe that they will be called in as fast as the currency balance in the Treasury will permit." Con-traction of this sort possesses the same evil as ex-pansion, inasmuch as it renders uncertain by subecting to the caprice of one man the measure of value. Now would be the time for Congress to step in and relieve Mr. Richardson of the responsi-bility, evidently too much for him, of de-termining that measure of value. In a responsible government like that of England, he could not hold office twenty-four hours in the face of the indignant protest that has come from the press and the country against his

THE PUBLIC DEBT STATEMENT, which will be found below, shows an apparent decrease for the month of February of \$1,845,241, but an actual increase since June 30, 1873, of \$7,061,353. The statement is placed in contrast changes. It will be seen that the reduction is of five per cents for six per cents and consequent saving on the interest account.

THE STOCK MARKET

finances, and his colleagues would be fortunate if

they escaped a like severe rebuke for having

to-day was subjected to various induences, which caused quite a revival of animatron, as will be seen by the official list of dealings printed below. In the morning it declined upon the further distrust of the future awakened by the published programme for fresh sales of gold, but rallied again in the afternoon, when the further addition to the outstanding legal tenders was learned. In the meantime additional reports of pro rata freight legislation in Wisconsin, which was said to have found favor with the Senate, while the Assembly had taxed the railroads of the State five per cent land that another strike of the locomotive eng neers was threatened-all combined to produce a uncertain and fluctuating market best learned

COMMERCIAL REPORT.

Cotton Dull and Rasier-Flour Steadier-Wheat 2c. a 3c. Higher-Corn Fairly Active-Oats Firmer-Pork Dull-Lard Weak-Naval Stores Quiet-Petroleum

There was a rather freer movement of merchan-dise to-day, notwithstanding the lower rate of gold. On 'Change a much better feeling obtained in breadstuffs, owing to the more favorable tenor quest and steadier, while wheat was comparatively active and decidedly higher, the market closing with still an advancing tendency. Corn was also the turn firmer at the close, full prices being bid for prime parcels. Oats were also firmer under a good demand. Whiskey was unchanged. Pork was still nominal, with closing quiet. Cotton ruled easier under the presclosing quiet. Cotton ruled easier under the pres-sure of accumulating stock at the ports, and "futures" showed a recession of about 1-16c. In naval stores the movement was moderate at prices showing no impor-tant variations. Petroleum, owing to a marked differ-ence in the views of buyers and sellers, was without activity and quite nominal in value. Coffee was firmer. Sugar dull of sale, with something of a downward ten-dency. Spices and fruits were for the most part without activity. hus separally directly held at favorer full prices activity, but generally firmly held at former full prices COTTON.—The market for spot cotton was dull. Buyers and sellers were apart in their views, and values were to some extent nominal for all grades. For forward de-liveries the market was moderately active at 1-16c. a ½c. decline, chiefly owing to the continuance of liberal re-ceipts at the ports and the duliness of the European markets. We quote:
